

Sgt. Henry Charles Joseph Buckler 1600800
RAFVR

Wireless operator Henry Buckler died after his Lancaster was hit by a 'friendly' bomb during a daylight operation.

He was part of a 166 Squadron crew which had arrived at Kirmington early in June 1944 and was heavily engaged in that summer's hectic bombing operations.

On 3 August 1944 they were tasked with taking part in an attack on a V1 storage site at Trossy St Maximin, north of Paris. It was their 20th operation.

Their aircraft, Lancaster ME839 AS-N, had left Kirmington at 1130 hours and was approaching the target when the flight engineer, Sgt Sydney Witham, spotted another Lancaster directly above them. As he shouted a warning a bomb hit AS-N, breaking off most of one wing. The pilot, F/O Hurbert Wagner, and Sgt. Witham managed to bale out but the other five members of the crew died when the Lancaster crashed. Sgt. Witham managed to evade capture but the pilot spent the rest of the war as a PoW.

Henry is buried with three other crew members in Creil Communal Cemetery. He was the 20-year-old son of George and Dorothy Buckler of Hayes in Middlesex.

The others who died were the navigator F/O William Richards RCAF, bomb-aimer Sgt. John Davies, mid-upper gunner Sgt. Francis Graham and rear gunner Sgt. Lewis Arthur.

His name can be found on panel 014.
