

**Sgt. William Donald
Dorey 1171809 RAFVR**

John Dorey was a young mid-upper gunner from

Northumberland whose Lancaster was the first to be lost by No. 12 Squadron. He was part of an experienced crew that was lost on a mining operation off the Danish coast on the night of 8/9 January 1943.

They had taken off from RAF Wickenby at 1857 hours, the squadron having recently become operational on their new Lancasters. His aircraft, W4371 PH-C, was one of the Lancasters delivered to the squadron in November 1942 as it converted from Wellingtons. *(One of these first Lancasters is pictured above at RAF Wickenby)*. W4371 was one of 73 aircraft sent out on mining operations off Denmark and France that night; it was one of two not to return. It is believed it had been shot down over the North Sea with no wreckage or bodies ever recovered.

William was part of a crew that included three Canadians, an Australian, two Englishmen and a South African serving in the RAF. Several of his crew members had been in action with 12 Squadron over the previous six months and they were two-thirds of the way through their tours of operation.

William came from the village of Tarsset, in the Kielder area of Northumberland, and was the 22-year-old son of William and Constance Dorey,

The others lost with him were the pilot WO2 Donald Marshall RCAF, flight engineer Sgt. George Hester, navigator WO2 John Buick RCAF, bomb-aimer Flt. Sgt. Raymond Cripps RAAF, wireless operator Flt. Sgt. Sydney Ramsay and rear gunner WO2 John Bradley RCAF. All are remembered on the Runnymede Memorial (panel 147).

William's name can be found on IBCC panel 029.
